Diplomatic and Consular Programs are financed by this appropriation, fees for services, and reimbursements from other agencies (including for administrative and other services provided by the Department of State). As in previous years, two-year funding is requested for this account, except for funds requested for Worldwide Security Protection (WSP), which is to remain available until expended. This account is the Department of State's primary operating account and funds a broad range of activities from policy setting, planning and design, to implementation and operations and maintenance. The 2012 request includes base funding for the State Department operations in Iraq, Afghanistan, and Pakistan that are supported by the Diplomatic and Consular Programs (D&CP) account. The balance of the funding requested for operations in Iraq, Afghanistan, and Pakistan is included in the Overseas Contingency Operations (OCO) account request for the D&CP account.

Funds are requested in the following categories:

Human Resources.—This activity supports American salaries at overseas and domestic United States diplomatic missions, including Department of State employees carrying out security protection activities. The professional development and training activity is a continuous process by which the Department ensures that its professionals have the skills, experience and judgment to fulfill its functions at all levels. Training programs are designed to provide employees with the specific functional

area and language skills needed for the conduct of foreign relations in the Department and abroad. This activity also supports the management, recruitment, and performance evaluation of Foreign and Civil Service employees (including efforts to attract a diverse applicant pool) and locally employed staff.

Overseas Programs.—This activity provides funding for the operational programs of all the regional bureaus of the Department of State, which are responsible for managing United States foreign policy through bilateral and multilateral relationships. Funds made available for 2012 will support 267 United States embassies, consulates, and other diplomatic posts worldwide. Resources for this activity are used to provide for: the political and economic reporting and analysis of interests to the United States; the representation of U.S. diplomatic and national interests to countries abroad; and the bilateral and multilateral negotiation of U.S. foreign policy objectives, including the hosting of and participation in various international conferences. meetings and other multilateral activities in the United States and abroad. Resources in this appropriation support the conduct of international informational programs of the United States. The resources in this activity are used to define, explain and advocate U.S. policies abroad and to seek to increase knowledge and understanding among foreign audiences of U.S. society and its values. This activity also encompasses medical programs for the Department of State, the Foreign Service and other U.S. Government departments and agencies overseas. Services are provided in Washington, D.C. as well as at missions worldwide, covering more than 90,000 employees, dependents and local hires. Centralized funding for travel and transportation of effects associated with the assignment, transfer, home leave and separation of the Department's personnel and dependents is also included in this activity.

Diplomatic Policy and Support.—This activity supports the operational programs of the functional bureaus of the Department of State, which includes providing overall policy direction, coordination, and program management among United States missions abroad in pursuit of regional and global foreign policy objectives, including the hosting of various international conferences and meetings in the United States and abroad. Resources also fund the management of U.S. participation in arms control, nonproliferation, and disarmament negotiations and other verification and compliance activities, in addition to funds otherwise available for such purposes. This activity, supported by fees for consular services, also encompasses overseas American citizen services; the issuance of passports to U.S. citizens both here and abroad; visa adjudication and prevention and detection of visa fraud; and implementation of a coordinated strategy to improve consular systems and processes in support of U.S. border security, including sharing data with the Department of Homeland Security, the Department of Justice, the Intelligence Community, the Treasury Department, and the law enforcement community. The information management activity in D&CP includes resources that are used for the effective and efficient creation, collection, processing, transmission, dissemination, use, storage, and disposition of information required for the formulation and execution of foreign policy and for the conduct of daily business. Its requirements are driven by the informational needs of the President, the Secretary of State, the Department and its 267 missions, and other Government agencies overseas. Components of the information management activity include: telecommunications; classified information handling; unclassified data and word processing; pouch, mail, and publishing services; administration of an electronic and archival records management program; document classification

and declassification; information security; information technology capital planning; and provision of information management services. Administration and staff activities are also included in this area. These activities include domestic and overseas administrative services directly related to Department programs, such as:

- —The direction and control of administration and management operations, and reviewing and setting resource levels and priorities for various programs and bureaus financed by this appropriation.
- —The budgeting, financial planning, and fiscal operations for bureaus and offices financed by this appropriation.
- —The contracting and procurement of services and supplies, maintenance and repair of equipment and property (including the operation and routine maintenance of property directly leased or owned by the Department), vehicle operation, and shipping and customs services.
- —Centralized funding for travel and transportation of effects associated with the assignment, transfer, home leave, and separation of the Department's personnel and dependents.
- —Rental payments to the General Services Administration for domestic space occupied by the Department.

Security Programs.—This activity provides for the operation of security programs, including for Worldwide Security Protection (WSP) and the Bureau of Diplomatic Security, to protect diplomatic personnel, overseas diplomatic missions, residences, domestic facilities and information. The salaries paid to Department employees who carry out the security protection function worldwide are included in the Human Resources program activity. This activity identifies resources that are used in meeting security and counterterrorism responsibilities, both foreign and domestic. Covered in this activity are: security operations; engineering services, which related to the technical defense of U.S. Government personnel and establishments abroad against electronic and physical attack; homeland security related activities; protection of Department personnel and foreign dignitaries; and physical security operations.

Under the direction of the Secretary of State, the overall mission of the Bureau of Overseas Buildings Operations (OBO) is to provide U.S. diplomatic and consular missions abroad with safe, secure, and functional facilities that support the foreign policy objectives of the United States. Specific program functions include: providing guidance to posts, the regional bureaus and other foreign affairs agencies on the renovation, construction and operations of facilities; providing expert space and facilities planning; managing and overseeing the design, construction, and renovation of mission facilities; incorporating security features into overseas and domestic facilities; and ensuring the security of facilities during construction or renovation. In addition, OBO is responsible for establishing standards and policies for overseas housing, developing, in conjunction with posts, effective maintenance programs for post facilities, and monitoring and reporting the inventory of maintenance and backlog requirements. OBO also ensures the safety of the building occupants through the development of fire/life safety and accessibility compliance programs.

In 2012, the Department will collect charges for the eighth year of the Capital Security Cost Sharing Program (CSCSP). The CSCSP has two main goals: accelerating the construction of approximately 150 new safe, secure and functional embassy and consulate compounds over fourteen years (2005–2018), at a cost of approximately \$17.5 billion, and providing an incentive for all United States Government agencies to right-size their presence overseas.

While over 20,000 U.S. government employees have been moved to safer, more secure facilities, over 45,000 remain in older, aging facilities, many of which cannot be replaced for many years. The 2012 request includes authority to implement a Maintenance Cost Sharing Program (MCSP) to provide critically needed renovation, construction and repair of overseas facilities, to provide adequate working conditions for multi-agency staffs, and

protect the US taxpayer investment. Under this proposal, a portion of the CSCSP funds would be used to maintain overseas facilities in 2012.

The objective of the Asset Management Program is to obtain the best use of diplomatic and consular properties overseas through sale of surplus or underutilized properties and reinvestment of the proceeds in properties that provide a greater return to the U.S. Government and/or improve the safety of mission personnel. In lieu of appropriated resources, OBO uses asset sales proceeds for long-term capital investment to minimize the growth of U.S. Government leasehold requirements (through property acquisition) or to address a high-priority need for new construction or fit-out of leased space.

This appropriation also provides for capital expenditures necessary to preserve, maintain, repair, and plan for buildings owned or leased by the Department of State overseas or in the United States, including the renovation of the Harry S Truman building where required.

This is a retirement fund for Locally Employed Staff (LES) employed by the Department of State and other Foreign Affairs agencies. The purpose of the fund is to accumulate and distribute

U.S. Government contributions for end-of-service benefits for LES at overseas U.S. missions where it has been determined that participation in the local social security system is not in the public interest. The State Department determines which countries are eligible to participate in the fund. Upon separation, payments will be made from the fund as a lump sum paid directly to the employee.

This fund, authorized by sections 13 and 23 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2684), finances on a reimbursable basis certain administrative services, such as printing and reproduction, editorial material, motor pool operations and dispatch agencies operations, inter-agency cooperative administrative support services, acquisition services, information technology desktop support, and expenses of carrying out the Foreign Missions Act, including any acquisitions of property under section 204(f) of the State Department Basic Authorities Act of 1956 (22 U.S.C. 4304(f)).

Using the Working Capital Fund, the International Cooperative Administrative Support Services (ICASS) program was fully implemented in 1998. ICASS restructures overseas administrative support activities to allow more decision-making and managerial participation by all participating agencies, more equitable cost distribution, and incentives for efficient provision of services. Under ICASS, each agency represented at an overseas post chooses the services it wishes to receive and pays a proportional share of the cost of those services. Working through inter-agency councils at each overseas post, all agencies have a say in determining post administrative budgets and defining service standards, as well as reviewing costs and vendor performance.

These international fisheries and whaling commissions coordinate scientific studies of shared fish stocks and other living marine resources and establish common management measures to be implemented by member governments based on their results. Many also oversee the allocation of fishing rights to their members. In addition, the Great Lakes Fishery Commission carries out a program to eradicate the invasive, parasitic sea lamprey. The marine science organizations coordinate international research on valuable fisheries, oceanography, and marine ecosystems and the results are publicly disseminated and used to advise member governments on fisheries and marine science policy.

The Global Health and Child Survival account funds health-related foreign assistance for the Department of State and the U.S. Agency for International Development (USAID), representing the majority of funds provided for the President's Global Health Initiative (GHI). The GHI seeks to improve health outcomes by adopting a women, girls, and gender-equity approach to health; increasing impact through strategic integration and coordination; strengthening and leveraging multilateral institutions; encouraging country ownership and investing country-led plans; building sustainability through health systems strengthening; improving metrics, monitoring and evaluation; and promoting research, development and innovation.

Global Health and Child Survival—State.—Within the GHI, the Global Health and Child Survival-State (GHCS—State) account supports the fight against global HIV/AIDS through the President's Emergency Plan for AIDS Relief (PEPFAR). The 2012 Budget requests \$5.642 billion in the GHCS—State account, which forms the bulk of PEPFAR funding (\$7.2 billion in total). PEPFAR is led by the Office of Global AIDS Coordinator in the

State Department, which partners with agencies such as the U.S. Agency for International Development (USAID), the Department of Health and Human Services, the Department of Defense, and the Peace Corps for program implementation. Programs work through expanded partnerships to build capacity for effective, innovative, country-led, and sustainable services, and to create a supportive and enabling policy environment for combating HIV/AIDS, including as part of the broader USG and countrylevel health and development approach. In addition, PEPFAR supports implementation of strong monitoring and evaluation systems to identify best practices, determine progress toward goals, and ensure compliance with PEPFAR policies and strategies. PEPFAR programs support scaling up HIV/AIDS prevention, care, and treatment services within the context of strengthened health systems, particularly in terms of human resources in nations with severe health worker shortages and lack of service delivery capacity. As part of the GHI, PEPFAR is linking its efforts to important programs in other areas of global health as well as other areas of development, including the areas of education, gender equity, and economic development. A contribution to the Global Fund to Fight AIDS, Tuberculosis and Malaria (the Global Fund) is included in the GHCS—State request.

Global Heath and Child Survival—USAID.—The 2012 Budget requests \$3.1 billion in the GHCS-USAID account for a comprehensive and integrated approach to global health programs as outlined in the GHI. USAID, working in partnership with foreign governments, local private sector and non-governmental organizations, and public-private partnerships, will build capacity, strengthen health systems, and promote sustainable integrated health care for more people. Funding includes activities that promote family planning/reproductive health, child survival and maternal health, polio, nutrition activities in coordination with the Feed the Future Initiative on food security to address such issues as micronutrients and iodine deficiency, as well as activities directed at vulnerable children, and reducing HIV transmission and the impact of the HIV/AIDS pandemic in developing countries. Funding is also requested to address the threat of other infectious diseases such as tuberculosis, malaria, influenza and other pandemic diseases, and neglected tropical diseases in developing countries.

The Millennium Challenge Account is administered by an independent U.S. Government corporation, the Millennium Challenge Corporation (MCC), that has the specific strategic goal of reducing poverty through growth in some of the poorest countries in the world. MCC was established on January 23, 2004, and has signed 22 compacts totaling over \$7.8 billion. These investments help foster stability through economic growth and poverty reduction in partner countries. MCC encourages policy reforms by working with only those countries that have created the conditions for growth by ruling justly, investing in their people, and committing to economic freedom, with a particular emphasis on fighting corruption. Countries develop their poverty reduction proposals in broad consultation with their own civil society and MCC. MCC compacts specifically define the implementation responsibilities of partner countries, including financial accountability and transparent and fair procurement practices, and require measurable results to ensure that MCC assistance is used responsibly and effectively. The President's 2012 Budget request assumes passage of legislative changes needed to maximize the impact of MCC assistance through more innovative approaches to the provision of that assistance.

This account supports U.S. foreign policy objectives by providing economic assistance to allies and countries in transition to democracy, supporting Middle East peace efforts, increasing stability in conflict/post conflict environments, and financing economic stabilization programs, frequently in a multi-donor context. Key objectives include:

- 1) Supporting strategically significant friends and allies through assistance designed to increase the role of the private sector in the economy, reduce government controls over markets, enhance job creation, and improve economic growth.
- 2) Developing and strengthening institutions necessary for sustainable democracy. Typical areas of assistance include technical assistance to administer and monitor elections, capacity-building for non-governmental organizations, judicial training, and women's participation in politics. Assistance is also provided to support the transformation of the public sector to encourage democratic development, including training to improve public administration; promote decentralization; and strengthen local governments, parliaments, independent media and non-governmental organizations.
- 3) Strengthening the capacity of partner governments to manage the human dimension of transitions out of instability and to help sustain the needlest sectors of the population during the transition period.

This account also includes funding for alternative development programs.

This assistance provides grants for foreign military and civilian personnel to attend military education and training provided by the United States Government either at U.S. military schools or by trainers in country. In addition to helping these countries professionalize their militaries, this program also exposes foreign students to American democratic values, particularly respect for civilian control of the military and for internationally recognized standards of individual and human rights.

loans that finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. The amounts in this account are a means of financing and are not included in budget totals. Expenditures from this account finance the subsidy element of direct loan disbursements and are transferred into the Foreign Military Financing Direct Loan Financing (FMFDLF) Account to make required loan disbursements for approved FMS or commercial sales. The FMFDLF is a financing account used to make disbursements of Foreign Military Loan funds for approved procurements and for subsequent collections for loans after September 30, 1991. The account uses permanent borrowing authority from the U.S. Treasury combined with transfers of appropriated funds from the Foreign Military Financing Direct Loan Program (FMFDLP) Account to make required disbursements to loan recipient country borrowers for approved procurements. Receipts of debt service collections from borrowers are used to repay borrowings from U.S. Treasury.

The Foreign Military Loan Liquidating Account (FMLLA) is a liquidating account that records all cash flows to and from the Government resulting from direct loans obligated and loan guarantees for foreign military financing committed prior to 1992. This account is shown on a cash basis and reflects the transactions resulting from loans provided to finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. No new loan disbursements are made from this account. Certain collections made into this account are made available for default claim payments. The Federal Credit Reform Act (FCRA) provides permanent indefinite authority to cover obligations for default payments if the liquidating account funds are otherwise insufficient. All new foreign military financing credit activity in 1992 and after (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year) is recorded in corresponding program and financing accounts.

As required by the Federal Credit Reform Act of 1990, the Military Debt Reduction Financing (MDRF) Account is a non-budgetary financing account that records all cash flows to and from the Government resulting from restructuring foreign military loans. The amounts in this account are a means of financing and are not included in budget totals. It is an account established for the debt relief of certain countries as established by Public Law 103–87, Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1994, Section 11, Special Debt Relief for the Poorest, Most Heavily Indebted Countries. The MDRF buys a portfolio of loans from the FMLLA, thus transferring the loans from the FMLLA Account to the MDRF Account.

The Clean Technology Fund (CTF) is an ongoing multibillion dollar effort to reduce the growth of emissions in developing countries by catalyzing large-scale private sector investments through financing the additional costs of commercially available cleaner technologies over dirtier, conventional alternatives. By funding the extra cost of the cleaner technology, the CTF incentivizes cleaner projects that leverage development bank financing, and attract new investor capital into low carbon sectors. The CTF, one of the two multilateral Climate Investment Funds, leverages the capital bases and country program expertise of the Multilateral Development Banks. To receive funding, eligible countries need to first develop credible national investment plans that identify key high-emissions sectors where targeted projects could stimulate low carbon growth and the scalable uptake of clean technologies. Since 2009, the CTF's governing committee has endorsed 14 such plans with a combined CTF funding envelope of \$4.3 billion and total planned investments of over \$40 billion. More specifically, the committee has approved nearly \$1.4 billion for the first 19 projects in these plans, which will mobilize total investements of over \$11 billion.

The Strategic Climate Fund (SCF), one of two multilateral Climate Investment Funds (CIFs), is a suite of three programs to pilot innovative approaches and scaled-up activities aimed at specific climate change-related challenges in developing countries. The Pilot Program for Climate Resilience (PPCR) helps the most vulnerable populations in very poor countries better prepare for and respond to the unavoidable effects of climate change through innovative development plans, strategies, and projects. The PPCR pilot programs are for Bangladesh, Bolivia, Cambodia, Mozambique, Nepal, Niger, Tajikistan, Yemen, Zambia, the Caribbean region (Dominica, Grenada, Haiti, Jamaica, Saint Lucia, Saint Vincent and the Grenadines) and the Pacific region (Papua New Guinea, Samoa, and Tonga). The Forest Investment Program (FIP) helps protect our global forests by reducing deforestation in developing countries through improved governance and forest management, and by addressing the drivers of deforestation. The FIP pilot programs are Brazil, Burkina Faso, Democratic Republic of Congo, Ghana, Indonesia, Laos, Mexico, and Peru. The Program for Scaling-Up Renewable Energy in Low Income Countries (SREP) will demonstrate the economic, social and environmental viability of low carbon development pathways in very poor countries. The SREP pilot programs are for Ethiopia, Honduras, Kenya, Maldives, Mali, and Nepal.

Persistent hunger remains an economic, development, and political challenge in many developing countries—as seen during the 2008 food price crisis. Without greater investment by developing countries and donors to address food insecurity, a significant reduction in the number of undernourished people (currently estimated by the United Nations' Food and Agriculture Organization at nearly 1 billion) is unlikely, with serious implications for poverty reduction efforts and political stability in these countries.

In response to this challenge and commitments made by leaders at the G-8 Summit in L'Aquila, Italy and the G-20 Summit in Pittsburgh in 2009, the United States and other donors (Australia, Canada, Spain, South Korea, and the Gates Foundation) established a new multi-donor trust fund — the Global Agriculture and Food Security Program (GAFSP) - in 2010 with initial pledges totaling nearly \$1 billion. The fund's public sector window helps finance the agricultural development strategies of developing countries that have demonstrated their commitment to a strategic approach for achieving lasting improvements in the food security of their populations. The fund, which is administered by the World Bank, leverages the technical expertise of other multilateral institutions such as the International Fund for Agricultural Development and the regional development banks. GAFSP received requests for funding from 25 low-income countries in 2010 and awarded grants totaling \$337 million to eight of those countries (Bangladesh, Ethiopia, Haiti, Mongolia, Niger, Rwanda, Sierra Leone, and Togo). Additional grant awards are anticipated to be made in 2011, depending on additional donor contributions. (The U.S. multi-year pledge is \$475 million). A private sector window, which will provide financing to small and medium-sized agribusinesses and small-holder farmers, will also become operational in 2011.

The fund incorporates a number of innovative design features including in-depth impact evaluations on a significant percentage of all the projects financed by GAFSP, an inclusive governance structure that provides potential recipient countries and civil society organizations with a strong role in fund governance, and an open and transparent application process that relies on inde-

pendent evaluations by a group of experts in agriculture and development issues.

The International Bank for Reconstruction and Development (IBRD or World Bank) provides financing and technical assistance to support infrastructure investment and policy reform. The IBRD operations are designed to promote sustainable economic growth, reduce poverty, and raise living standards, including through targeted investments in infrastructure, basic human needs, private-sector development, and core policy reforms. During 2010, the IBRD made new commitments of \$44.2 billion and gross disbursements of approximately \$28.9 billion. Since its establishment in 1945, the IBRD has made loans totaling almost \$525

billion. The 2012 Budget provides \$117.4 million for the first of five installments for the International Bank for Reconstruction and Development (IBRD) General Capital Increase (GCI). Absent the GCI, the Banks lending capacity would fall due to increased lending levels during the global financial crisis.

Global Environment Facility

The IBRD acts as Trustee for the Global Environment Facility (GEF) Trust Fund. The GEF provides partial funding for developing country projects designed to provide global environmental benefits by reducing greenhouse gas emissions, protecting international waters, promoting biodiversity conservation, reducing persistent organic pollutants and ozone depleting substances, and preventing and controlling desertification and deforestation. With its highly specific focus on global environmental issues, where both costs and benefits are shared across international borders, the GEF occupies an important niche in the system of international development institutions. Its basic mission is to support capacity building and innovative and cost-effective investments whose design and environmental benefits can be duplicated (and financed) elsewhere. Since its inception in 1991, the GEF has allocated over \$9.2 billion in grants, leveraging over \$40 billion in co-financing, to support more than 2,700 projects in over 165 countries.

In 2010, donor governments agreed on the fifth replenishment of the GEF. During the replenishment negotiations, the United States achieved important policy reforms to improve the GEF's overall effectiveness, particularly with regard to country-owned business plans for GEF funding and resource allocation . The 2012 Budget includes \$143.8 million for the second of four scheduled installments of GEF-5.

The International Development Association (IDA) is a member of the World Bank Group and provides concessional development financing and grants to the world's poorest nations. These countries are primarily in Sub-Saharan Africa and South Asia, but also in Latin America, Eastern Europe, and the former Soviet Union. IDA's primary goal is to help recipient countries achieve sustained economic growth and poverty reduction, and particularly to meet the exceptional development challenges faced by Africa within its broad commitment to support all the world's poor countries. IDA is the single largest source of multilateral lending extended on concessional terms to developing countries. Projects have to meet the same economic, financial, and environmental standards as other World Bank projects. IDA resources for new lending are provided primarily by new donor contributions through 3-year replenishments, and are augmented by earnings, payments of existing loans, and transfers of income from the nonconcessional windows of the World Bank.

During 2010, IDA made new commitments of \$14.6 billion. Since its establishment, IDA has made commitments totaling \$234 billion. The largest regional share of 2010 IDA resources, 49 percent, went to Africa.

Under the 16th replenishment (IDA-16), IDA will provide total resources for prospective new commitments of \$49.2 billion over the mid-2011 through mid-2014 period. Through the IDA-16 replenishment negotiations, U.S. leadership secured a number of commitments for reform. These include reforms to strengthen IDA's financial model, ensure resources for crisis-impacted and post conflict countries, and sharpen IDA's focus on development impact and results. IDA-16's internal loan reflows will be boosted by accelerating repayment of IDA credits by graduates like China, and by employing somewhat less concessional financing terms for higher income IDA-blend countries that also have access to the Banks non-concessional lending window. IDA-16 will establish a crisis response window to provide resources for countries hit by natural disasters (e.g. Haiti) and severe, exogenous economic shocks. In IDA-16, supplemental assistance for post-conflict countries will be extended, on a case-by-case basis, beyond the current 10-year limit, providing critical resources for countries like Afghanistan. The IDA-16 Results Measurement Framework will expand the use of common core sector indicators which can be measured across countries. IDA-16 will also include a stronger framework for project impact evaluation to improve accountability and inform the deployment of limited development resources.

The 2012 Budget includes \$1,358.5 million for the first of three scheduled installments under IDA-16. The U.S. pledge for IDA-16 is \$4,705.5 billion over three years and is based on the reform commitments described above.

Multilateral Debt Relief Initiative

In June 2005, the Group of 8 (G-8) major industrial countries proposed the Multilateral Debt Relief Initiative (MDRI) whereby

IDA would cancel 100 percent of its debt claims on countries that reach the Heavily Indebted Poor Countries (HIPC) completion point. The HIPC initiative entails coordinated action by governments and international financial institutions to reduce the external debt burdens of HIPC countries to sustainable levels. The MDRI goes further by providing irrevocable debt stock reduction so as to free up additional resources for poverty reducing expenditures. Under the MDRI, donors have committed to compensate the World Bank Group dollar for dollar for the MDRI-related foregone reflows over a 50-year MDRI period (2004 to 2054). The 2012 Budget provides \$91 million to meet the remainder of our IDA-15 portion of our MDRI commitment and \$76 million as a first payment for the IDA-16 portion of our MDRI commitment.

The Multilateral Investment Guarantee Agency (MIGA) is a member of the World Bank Group. MIGA is designed to encourage the flow of foreign private investment to and among developing countries by issuing guarantees against noncommercial risks and carrying out investment promotion activities. During World Bank 2010, MIGA issued 28 guaranteed contracts, with a maximum aggregate contingent liability of \$1.5 billion. Since MIGA's inception, estimated foreign direct investment facilitated totals more than \$87 billion, as of June 30, 2010. Negotiations on MIGA's first General Capital Increase (GCI) were completed in 1998. The United States committed to contribute a total of \$30 million in paid-in capital and nearly \$140 million in callable capital over three years. The agreement included commitments from MIGA on a range of policy issues of substantial importance to the United States, including environment, information disclosure, labor, and creation of an inspection function for greater accountability and transparency. In 2000, the Administration sought and received congressional authorization for the United States' full participation in the MIGA GCI. No request is being made for MIGA for 2012.

The Inter-American Development Bank (IDB) promotes sustainable economic growth and productivity, poverty reduction, private sector development, and good governance in Latin America and the Caribbean through loans and technical assistance. During 2010, the IDB approved \$12.6 billion in loans. Since its inception, the IDB has approved a total of \$198 billion. The IDB provides financing through: 1) the Ordinary Capital window that lends at market-based rates, and 2) the Fund for Special Operations (FSO), which provides financing on concessional terms to the region's poorest nations.

The 2012 Budget provides \$102.0 million for the first of five installments for the Inter-American Development Bank's (IDB) Ninth General Capital Increase (GCI). The United States used this opportunity afforded by the capital increase negotiations to consolidate key institutional reforms and improve the strategic direction of the IDB in assuring sound finances, effective management and governance, safeguards, transparency and accountability, disclosure, and focus on core missions including the needs of the poorest populations.

Inter-American Investment Corporation

The Inter-American Investment Corporation (IIC), established in 1984, is a member of the Inter-American Development Bank Group, whose purpose is to promote development of private small and medium sized enterprises (SMEs) in Latin America and the Caribbean. It is a legally autonomous entity whose resources and management are separate from those of the Inter-American Development Bank itself. Through direct loans and equity investments in SMEs as well as through lending to private financial intermediaries, the IIC helps SMEs in the region to access the medium/long-term capital necessary to start-up, expand, or modernize their operations. During 2010, the IIC approved 51 projects totaling \$376 million. Since its inception, the IIC has approved 650 projects for a total amount of \$4.0 billion.

The 2012 Budget provides \$20.4 million to clear remaining U.S. arrears to the IIC. The deadline to pay for subscribed shares from the 1999 capital increase expired March 31, 2008 (the original deadline was October 31, 2007, but the IIC granted the United States an extension). Despite reluctance by IIC membership to

extend the deadline further, the United States was able to successfully broker another extension in which the United States would pay 10 percent of its arrears in 2010, 45 percent of its arrears in 2011 and 45 percent of its arrears in 2012. A failure to meet this financing deadline would result in the reduction of shareholding in the IIC to 22 percent (from 25 percent).

The Asian Development Bank Group promotes broad-based sustainable economic growth and development, poverty alleviation, and cooperation in the Asia/Pacific region. It has two main financing windows: 1) the Asian Development Bank's "hard-loan" window (known as the Ordinary Capital Resources window or OCR), and 2) the Asian Development Fund (AsDF) the "soft-loan" window which lends at concessional rates to the region's poorest

830 Multilateral Assistance—Continued Federal Funds—Continued THE BUDGET FOR FISCAL YEAR 2012

Contribution to the Asian Development Bank—Continued nations. and for the ninth replenishment of the Asian Development Fund (known as AsDF10) in May 2008.

In 2010, the AsDB Group lent roughly \$10 billion from its hard-loan window and extended an estimated \$3.2 billion in AsDF loan and grant resources. Since its founding in 1966, the AsDB has committed approximately \$166 billion in loans. In addition, the AsDB Group has made cumulative private sector loans, guarantees, and equity investments of over \$12.6 billion. In 2010, the AsDB Group extended \$1.6 billion in private sector assistance in the form of loans, equity investments, guarantees, and syndications. None of this important work would be possible without the ongoing support of shareholders and donors, including the United States.

Asian Development Bank

The 2012 Budget provides \$106.6 million for the second of five scheduled paid-in capital contributions to the AsDB's fifth General Capital Increase. The hard-loan window of the Asian Development Bank is funded through periodic capital contributions from shareholders, against which the bank borrows in international capital markets. The United States completed negotiations on the fifth General Capital Increase in May 2009. This capital increase (GCI V) achieved key reform priorities for the United States, including upgrading the AsDB's policies on environmental safeguards, strengthening the AsDB's internal controls, and modernizing its risk management practices. Other key achievements include commitments to professionalize human resources, and ensuring adequate resources for U.S. foreign policy priorities in the region. The United States was also able to achieve a higher level of contribution from the bank's net income to the the Asian Development Fund. The U.S. pledged a paid-in capital contribution of \$533 million over five years for this agreement.

Asian Development Fund

The 2012 Budget also provides \$115.25 million for the third of four scheduled contributions under AsDF10. This replenishment achieved key priorities for the United States. The AsDF established a grants window, following the example of the International Development Association and the African Development Fund. During the AsDF10 period, grants are expected to reach \$2.75 billion, or 25 percent of total AsDF10 operations. The AsDF continues to strengthen the use of the performance-based allocation system in determining resource levels to borrowing countries. The AsDF10 agreement also solidified a comprehensive results management system to measure and guide the AsDB's operations and lending programs. Finally, the AsDF has prioritized operations for reconstruction and development in Afghanistan, which will receive \$1.1 billion in resources, all in the form of grants. The U.S. has pledged \$461 million over four years for the AsDF-10, the same contribution as that pledged during the last replenishment cycle.

The African Development Bank group is composed of 1) the African Development Bank (AFDB), which lends at prevailing rates to middle income countries and private sector borrowers in middle- and low- income countries, and 2) the African Development Fund (AfDF), which provides grants and concessional loans to the poorest African countries.

African Development Bank

In 2010, the AfDB approved new projects, programs, and equity investments amounting to about \$4.46 billion. Since its first operations in 1967, AfDB has financed projects, programs, and equity investments amounting to about \$52 billion. The 2012 Budget includes \$32.4 million for the first of eight payments for the sixth general capital increase for the African Development Bank (GCI-6).

In May 2010, AfDB Governors agreed on a 200 percent general capital increase to support an increase in the AfDB's sustainable lending capacity from \$1.8 billion per year to \$5 billion per year. As GCI-6 was negotiated, the U.S. played a major role in securing the following set of reforms to the AfDB's finances and operations: (1) Updating its liquidity policy and borrowing constraints created about \$4 billion in additional lending headroom and will permit more effective leveraging of new capital. (2) A 20 basis point increase in loan charges will better cover loan-related administrative costs. (3) A new, comprehensive financial model will better integrate decisions on loan pricing, administrative expenses, net

income allocation (including increased transfers to the Banks concessional window) and capital adequacy. (4) At least 40 percent of private sector operations will benefit low-income countries. (5) Significant strengthening of risk management functions will safeguard AfDB resources, with particular attention to risks associated with private sector operations in low-income countries with weak investment climates. (6) Capacity for investigations and audits will grow, commensurate with the loan portfolio. (7) The Bank extended its results framework from a previous focus exclusively on the AfDF to now also include the work of the AfDB. (8) The Bank is updating the content and accessibility of information on its web site, which will include publicizing a list of firms and individuals found to have engaged in wrongdoing in MDBfinanced development projects. (9) The AfDB is reviewing its disclosure policy and practice to meet the highest standards applied by other MDBs. This will include strengthening the presumption of disclosure by eliminating the positive list and emphasizing a limited negative list.

African Development Fund

The AfDF approved \$2.04 billion for new projects and programs in 2010. Since its first operations in 1974, cumulative AfDF financing totals an estimated \$35 billion. The Budget provides \$195 million for the first of three installments of the U.S. contribution to the twelfth replenishment of the African Development Fund (AfDF-12), which covers the period from 2012 to 2014.

In September 2010, the United States and other donor countries reached agreement on AfDF-12, which will provide approximately \$3 billion per year in development financing for low-income countries in Africa. The United States has been a leading voice for policy reforms to maximize the AfDFs development effectiveness. In addition to the Bank-wide policy reforms agreed as part of the general capital increase, the following policies were negotiated for AfDF-12: (1) AfDF will employ rigorous performance metrics to allocate the large majority of its resources. Country allocations will continue to be based on Country Policy and Institutional Assessment scores (a broad measure of the strength of governance), performance on the AfDF project portfolio, population, and per capita income, with the country performance metrics receiving the highest weight. Resources in the regional operations set-aside will be allocated based on a new performance scorecard. Supplemental assistance through the fragile states facility will be allocated through a formula based on PBA country allocations. (2) The Bank will build upon the significant progress it has already made on quality and results reforms. This will include more frequent reporting on results using an expanded set of common core sector indicators that can be measured across countries, stronger quality control on project design and country strategy development, and a revitalized independent evaluation group. (3) Budget support lending will be capped at 25 percent of total AfDF lending. (4) AfDF resources set aside for regional operations will increase to 20 percent of AfDF-12 resources (from 17.5 percent in AfDF-11), recognizing the Bank's strength in this area and the importance of regional integration to building markets and boosting economic growth on the continent. (5) The Bank's environmental and social safeguards policy will be reviewed and strengthened through a process involving input from civil society organizations.

Multilateral Debt Relief Initiative

In June 2005, the Group of 8 (G-8) major industrial countries proposed the Multilateral Debt Relief Initiative (MDRI) whereby the Africa Development Fund (AfDF) would cancel 100 percent of its debt claims on countries that reach the Heavily Indebted Poor Countries (HIPC) completion point. The HIPC initiative

entails coordinated action by governments and international financial institutions to reduce the external debt burdens of HIPC countries to sustainable levels. The MDRI goes further by providing irrevocable debt stock reduction so as to free up additional resources for poverty reducing expenditures. Under the MDRI, donors have committed to compensate the African Development Bank Group "dollar for dollar" for the MDRI-related foregone AfDF reflows over a 50-year MDRI period (2004 to 2054). The 2012 Budget provides \$7.5 million as a first payment toward the AfDF MDRI commitment.

Contribution to the European Bank for Reconstruction and $$\operatorname{\textbf{Development}}$$

The European Bank for Reconstruction and Development (EBRD) supports market-oriented economic reform and democratic pluralism through predominately private sector lending and investments in the nations of Central and Eastern Europe and the former Soviet Union. The United States and other shareholders signed the articles of agreement of the EBRD on May 29, 1990, and the Bank officially began operating on April 15, 1991. In April 1996, shareholders approved a doubling of the EBRD's capital base from EUR 10 billion to EUR 20 billion (approximately \$24 billion) which went into effect in April 1997. As of the end of 2010, approximately 75 percent of the Bank's portfolio was in the private sector. Since its inception, the EBRD has provided over \$65 billion in financing for over 2,800 operations, contributing to investments in the region worth over \$205 billion.

In May 2010, the EBRD's Board of Governors approved a 50 percent increase in the EBRD's capital which is structured as a transfer of \$1.39 billion (EUR 1 billion) from reserves to paid-in capital, and a temporary increase of \$12.5 billion (EUR 9 billion) in callable capital. EBRD will use this augmented capital to support a temporary expansion of lending and investment in response to the regional effects of the financial crisis.

For 2012, the Administration is seeking authorization to contribute \$1.25 billion (EUR 900 million), as the U.S. pro-rata contribution to a temporary increase in the EBRDs callable capital. Funding the U.S. share of the temporary increase in callable capital requires congressional authorization, but not an appropriation.

NORTH AMERICAN DEVELOPMENT BANK

The North American Development Bank (NADBank) provides financing for environmental infrastructure projects in the U.S.-Mexico border region. A portion of its capital also finances NAF-TA-related community adjustments and investment projects in both countries. Under NADBank's charter, the United States and Mexico contributed equally to NADBank's capital, a total contribution of \$450 million in paid-in capital and \$2.55 billion in callable capital. There is no paid-in request for 2012.

NADBank finances environmental infrastructure projects that have been certified by the U.S.-Mexico Border Environmental Commission (BECC), an institution designed to assist States and local communities on both the U.S. and Mexican side in coordinating border projects.

As of December 2010, NADBank had approved \$791.41 million in loans for 60 projects and \$89.79 million in grants for 39 projects. The Bank has also administered \$564.65 million in EPA-funded grants to 92 projects in Mexico and the United States.

The Multilateral Investment Fund (MIF), administered by the Inter-American Development Bank, provides grants and loans to support private-sector development and finance and labor sector reforms in Latin America and the Caribbean. Special consideration is given to reforms that encourage private foreign direct investment and promote privatization. Grants and loans are used for technical assistance to identify and resolve investment constraints, for investment in human capital, and for business infrastructure and development.

During 2010, the MIF approved 100 projects totaling \$116 million. Since its inception in 1992, the MIF has approved 1,567 projects, of which the MIF contribution totaled more than \$1.79 billion.

The United States made a commitment to the MIF in 1992 amounting to \$500 million. Negotiations were completed in early 2005 for the first replenishment of the MIF with a United States commitment of \$150 million to be paid in six equal annual installments. The United States achieved its key objectives in these negotiations: a strengthened commitment to measurable results, increasing efficiency, maintaining a focus on grants, allocating resources to maximize innovation, reforming Inter-American Development Bank procurement, and instituting a sunset clause. Grant funding will be about 75 percent of all funding approvals.

The 2012 Budget provides \$25.0 million for the sixth and last installment payment for the first replenishment of the MIF (MIF II)

The International Fund for Agricultural Development (IFAD) was established in 1977 as a multilateral financial institution focused on promoting rural agricultural development and food security in poorer countries. IFAD's specific mandate is to assist rural small-scale producers and subsistence farmers to increase their productivity and incomes, improve food security, and help integrate them into larger markets.

The 2012 Budget provides \$30 million for the third of three scheduled contributions under IFAD's eighth replenishment (IFAD-8). In December 2008, negotiations were concluded on IFAD-8 and the U.S. pledged a total of \$90 million which will leverage resources to provide a \$3 billion work program over the three-year replenishment period 2010–2012. The U.S. exercised leadership to achieve key objectives, including human resources reform to improve the institution's staff profile, incentive structure, and increase the proportion of operational staff; continued application of a strong performance-based allocation system; a five-tiered results framework; clear measures to enhance the independence of the internal audit function including consultation on hiring and removal of the internal auditor; and a commitment

for IFAD to develop comprehensive environment, natural resources and climate change policies.

This account provides technical assistance to other countries in support of U.S. foreign policy objectives and in support of the responsibilities of the U.S. Treasury Department to formulate, conduct and coordinate the international financial policies of the United States. Pursuant to OTA's authorizing statute, technical assistance provided through this account facilitates key shortand medium-term reforms in developing countries, specifically

in the policy and management areas of budget, revenue, government debt, financial institutions and financial enforcement.

The proposed appropriation will fund full-time resident technical assistance advisors, intermittent advisors, and program-related administrative costs. The appropriation will support technical assistance programs: in Asia, the Middle-East, Africa, Latin America, and the Caribbean. It will enable continued technical assistance to developing and transition countries to strengthen their capacity to manage public finances through efficient revenue collection, well-planned and executed budgets, judicious debt management, fundamentally sound banking systems, and strong controls to combat corruption and economic crimes, including terrorist financing. It will also support Treasury's work to strengthen financial infrastructure and combat terrorist financing in national security priority countries, where long-term stability will depend on strong financial governance. The Treasury Department will continue to coordinate activities with international financial institutions, USAID, the Department of State, and other relevant U.S. Government agencies when determining where its technical assistance program can have the greatest positive impact.

The Global Fund to Fight AIDS, Tuberculosis and Malaria (Global Fund) account exists to obligate and disburse U.S. contributions to the Global Fund which come from appropriations within the Departments of State and Health and Human Services. The United States was a driving force in the creation of the Global Fund, a public-private partnership developed to finance country-led effort to fight the three diseases, and the U.S. government made the founding pledge of \$200 million to the Global Fund in May 2001. The Global Fund became a non-profit foundation under Swiss law in January 2002, and the Global Fund Board approved the first grants in April of that year.

The purpose of the Global Fund is to attract, manage, and disburse resources through a public-private partnership that make a sustainable and significant contribution to the reduction of infections, illness and death, thereby mitigating the impact of HIV/AIDS, tuberculosis and malaria in countries in need. The Global Fund pursues an integrated and balanced approach to prevention, treatment, care and support. The innovative Global Fund model finances programs developed by the recipient countries themselves in line with national strategic health plans and priorities. The requirement that all areas of society with a stake in public health be involved in the proposal development process, including civil society and private sector, ensures strong and comprehensive programs. The Global Fund works through efficient, effective disbursement mechanisms, based on grant performance, minimizing transaction costs and operating in a transparent and accountable manner based on clearly defined responsibilities.

As of December 17, 2010, there have been more than \$29.8 billion in pledges and \$18.2 billion in contributions to the Global Fund from developed and developing country governments, foundations, corporations, innovative financing mechanisms, and individuals. The U.S. government is the largest donor, with more than \$9.5 billion in pledges and more than \$5.1 billion in contributions. The 2012 request includes \$1.3 billion for the Global Fund, including \$1 billion from the Global Health and Child Survival account and \$300 million from the National Institutes of Health/National Institute of Allergy and Infectious Diseases.

In addition to its assessed payments, the United States contributes to voluntary funds of many UN-affiliated and other international organizations and programs involved in a wide range of sustainable development, humanitarian, scientific, environmental and security activities. The 2012 request includes funding that reflects the Administration's continued support for the UN Funds and Programs, including the UN Children's Fund (UNICEF), the UN Development Program (UNDP), and the United Nations Population Fund (UNFPA), as well as international climate change activities and the newly established UN Women program.

The 2012 Budget provides \$15 million for Treasury implementation of the Tropical Forest Conservation Act (TFCA) which authorizes debt relief for low and middle income countries to support conservation of tropical forests.

TFCA received strong bipartisan support and was signed into law in 1998. Modeled after the Enterprise for the Americas Initiative (EAI), P.L. 105–214, as amended, it allows the Administration to reduce outstanding concessional U.S. Agency for International Development and P.L. 480 debt stocks to support conservation of tropical forests in eligible developing countries. Seventeen TFCA debt reduction agreements have been concluded with 14 countries: Bangladesh, Belize, El Salvador, Peru (two agree-

ments), the Philippines, Colombia, Jamaica, Panama (two agreements), Paraguay, Guatemala, Botswana, Costa Rica (two agreements), Indonesia and Brazil. In total, these agreements will generate over time more than \$260 million to support forest conservation.

Development Assistance Programs.—The U.S. Agency for International Development (USAID) uses these funds to promote transformational development in developing countries working in partnership with foreign governments, local private sector and non-governmental organizations, and public-private partnerships. These programs enable our foreign partners to implement the often difficult political, economic and other systemic changes that must occur to achieve sustainable development. These programs help a country become more self reliant by sustaining economic and social progress.

Promoting economic growth.—Funding supports trade and investment programs to increase the capacity of developing countries to participate effectively in the global trading system, comply with trade agreements, improve food security, mitigate the effects of and build reslience to the impacts of global climate change, improve business climates, and raise productivity. Development Assistance programs also support economic reforms, help create new job opportunities, expand access to market information, improve the knowledge and skills of entrepreneurs and workers, and support robust agricultural and natural resource management programs.

Governing justly and democratically.—Funding supports countries to strengthen their rule of law and respect for human rights, encourage open and competitive political processes, promote the development of a politically active civil society, and encourage more transparent and accountable government institutions.

Investing in people.—Funding helps to develop human capital through programs such as improved and expanded access to basic education, especially for girls and women, and higher education and training to expand the skilled human capital base that is needed for development.

Peace and security.—Funding for conflict mitigation and reconciliation activities are designed to meet the unique needs of fragile or crisis prone countries to establish a foundation for longer-term development by promoting reconciliation, supporting peace processes, and providing support for addressing the root causes of violence through peace building programs.

USAID Forward Initiatives.—Funding will support initiatives on innovation, evaluation, and science and technology, changing the way USAID develops and brings innovations to scale, uses scientific advancements, and evaluates its work. The Development Innovation Ventures (DIV) program invests resources in testing and scaling-up innovative and high-return development projects. Science and technology funding supports a series of partnerships and Grand Challenges for Development to bring the power of science to bear on major development problems. Evaluation funds support a rebuilding of USAIDs capacity for performance monitoring and rigorous evaluation.

The International Disaster Assistance (IDA) account provides funds to save lives, reduce human suffering, and mitigate and prepare for natural and complex emergencies overseas. Specifically, these funds provide for the management of humanitarian assistance, rehabilitation, disaster risk reduction, and transition to development assistance programs. Humanitarian relief interventions include, but are not limited to, shelter, emergency health and nutrition, and the provision of safe drinking water.

IDA programs target the most vulnerable populations that are affected by the shock of the disaster including those that are internally displaced.

The request includes \$300 million for emergency food security, which will be used for local and regional purchase of food and other interventions, such as cash voucher and cash transfer programs to facilitate access to food.

The Transition Initiatives (TI) account addresses opportunities and challenges facing conflict-prone countries and those countries making the transition from the initial crisis stage of a complex emergency to sustainable development and democracy. Programs are focused on advancing peace and stability, including promoting responsiveness of central governments to local needs, civic participation programs, media programs raising awareness of national issues, addressing underlying causes of instability, and conflict resolution measures. Recent country examples where TI funds were used include Afghanistan, Pakistan, Haiti, Yemen, Sudan, Kyrgyzstan, and Zimbabwe.

TI funding provides core operational funds for the Office of Transition Initiatives within the U.S. Agency for International Development Bureau for Democracy, Conflict, and Humanitarian Assistance.

The Fund, authorized by section 635(m) of the Foreign Assistance Act of 1961, finances on a reimbursable basis the costs associated with providing administrative support to other agencies under the International Cooperative Administrative Support Services (ICASS) program overseas. Under ICASS, each agency pays a proportional share of the cost of those services they have agreed to receive. Working through inter-agency councils at post, all agencies have a say in determining which services the USAID mission will provide, defining service standards, reviewing costs, and determining funding levels. The Fund is also used for deposit of rebates from the use of Federal credit cards, the deposits then being made available for start-up costs at new ICASS service provider missions and for technical support to missions currently providing services.

As required by the Federal Credit Reform Act of 1990, this account records, for the Development Credit Authority, the subsidy costs associated with direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program and legacy USAID credit programs. The subsidy amounts are estimated on a net present value basis; the administrative expenses are estimated on a cash basis.

In 2012, the U.S. Agency for International Development (USAID) will use the Development Credit Authority (DCA) transfer authority to support DCA projects in every region of the globe and every economic sector targeted by USAID. DCA augments grant assistance by mobilizing private capital in developing

countries for sustainable development projects. Credit assistance under DCA is principally intended for use where a development activity is financially viable, where borrowers are creditworthy, and where there is true risk sharing with private lenders.

In 2012, the request for \$50 million in DCA transfer authority will continue to support the flow of credit to microfinance institutions, small and medium enterprises, agribusinesses, and housing projects. In addition, USAID intends to scale guarantees, particularly for key Administration priorities such as food security, climate change, water, and health. The request for \$8.3 million in credit program administrative expenses will fund the total cost of development, implementation, and financial management of the DCA program, as well as the continued administration of USAID's legacy credit portfolios.

This account transfers funds to the operating expense account for the Peace Corps to finance upward adjustments of recorded obligations because of foreign currency fluctuations. Transfers are made as needed to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this appropriation and available for subsequent transfer when needed. The account is replenished through the utilization of a special transfer authority that allows the Peace Corps to withdraw unobligated balances from the operating expenses account from prior years as long as the authorized limit of \$5 million is not exceeded at the time of the transfer.

The Inter-American Foundation (IAF) funds grassroots development initiatives designed by the organized poor in Latin America and the Caribbean. The IAF has carried out its mandate by responding with grant support to the most creative ideas for

community self-help received from grassroots groups and nongovernmental organizations. The IAF uses objective indicators to gauge the results of its grants in improving the quality of life in poor communities and disseminates the experiences to a broad audience that includes private and public sector donors, development professionals, academics, and other interested parties. In 2012, the IAF will seek to expand partnerships with other federal agencies and donors.

Development Grants.—Grants are awarded directly to non-governmental organizations in Latin America and the Caribbean to carry out community development projects. In 2012, the IAF plans to award approximately 75 new grants and to supplement with additional funds approximately 20 grants awarded in previous years.

Leveraging of Resources.—Beneficiary communities own the projects and contribute their own resources alongside IAF funds to carry them out. They are also encouraged to partner with local governments and the local private sector to sustain their efforts after the grant period. RedEAmerica, a network of the hemisphere's corporate foundations that have adopted the IAF's bottom-up approach, invests its funds in community self-help programs. RedEAmerica members that are parties to the IAF cooperative agreements match IAF funding two-to-one; the entire network raises contributions from a variety of sources. Additionally, U.S-based migrant associations are joining the IAF to support grassroots development in their home communities. The IAF contributes to thought leadership in grassroots development by funding field research for a limited number of PhD candidates.

Evaluations and Other Activities.—Each year the progress of all IAF grantees is routinely assessed and a sample of completed projects undergoes comprehensive evaluation of the projects' impacts in the communities four to five years after IAF funding has ended. The IAF also produces and distributes regularly scheduled publications on its projects, on trends in development, and on other topics of interest to the development profession. The IAF contributes to the state of knowledge on grassroots development by funding field research for a limited number of PhD candidates.

Program Management and Operation.—The IAF also manages resources that cover salaries and benefits, travel, reimbursable service agreements with other U.S. government agencies, rent, service contracts, and other support costs.

AFRICAN DEVELOPMENT FOUNDATION—Continued

The African Development Foundation (ADF), a public corporation, is an independent agency of the U.S. Government, established to support African-designed and African-driven initiatives to address grassroots economic and social problems, alleviate poverty, and promote sustainable development. ADF provides grants of up to \$250,000 directly to community groups, agricultural cooperatives, and small enterprises. These grants help organizations create tangible benefits such as increasing or sustaining the number of jobs in a community, improving income levels, and addressing social development needs. ADF also funds African NGOs in each country to provide technical assistance to improve project outcomes.

In 2012, ADF will provide grants to recipients in 21 African countries, directly to small farmer and agricultural cooperatives, other grassroots groups, and small, African-owned enterprises. These investments will be focused at the marginalized end of the economic and social spectrum to promote two strategic goals:

- 1) Advance community-based food security and sustainable development, and empowerment of the poor in Africa. ADF will promote smallholder agricultural development and micro and small enterprise to generate income and employment. ADF will increase participation of producer groups and African-owned small enterprises to promote economic development, including trade and investment.
- 2) Expand local capacity to promote and support grassroots development. ADF will build local community development Partner Organizations that provide technical assistance and support to grassroots groups. ADF will continue to leverage additional funding through strategic partnerships with national and local governments, and other donor entities. ADF will encourage African governments and other donors to increase utilization of grassroots development "practices."

These funds are used in coordination with appropriated amounts to further expand the reach and impact of ADF's programs.

INTERNATIONAL MONETARY PROGRAMS

In December 2010, the Governors of the International Monetary Fund (IMF) approved proposals for the Fourteenth General Review of Quotas, agreeing to take the necessary actions to double total IMF quotas and realign quota shares to better reflect the changing relative position of IMF member countries in the world economy. The agreement includes a rollback of the New Arrangements to Borrow (NAB), while maintaining the relative shares of members of the NAB. The technical terms of the rollback are being reviewed over the coming year. The Administration anticipates requesting legislation for the quota increase and the NAB rollback, perhaps as early as the 2013 Budget. Under the agreement, the U.S. quota in the IMF would roughly double, while the final details of the corresponding NAB rollback will be determined as part of the current review. Given the current uncertainty over the details and timing of the final package, the full cost impact

of the commitments, if any, would be difficult to estimate at this time. In order to avoid presupposing the outcome of the review, an estimate of the approved proposals is not being reflected herein.

The United States participates in the International Monetary Fund (IMF) through a quota subscription. The United States quota to the International Monetary Fund (IMF) is denominated in Special Drawing Rights (SDRs) and is presently SDR 37,149,300,000 (about \$57.2 billion as of December 30, 2010). Quotas are the metric used by the Fund to assign voting weights to determine contributions to the IMF's general resources and to determine access to IMF financing. This account reflects IMF quota resources appropriated prior to 2009.

With respect to this account, use by the IMF of the quota commitment does not result in net budget outlays because the United States receives an increase in its international monetary reserves corresponding to any transfer of dollars under the U.S. quota subscription. The United States can use these interest-bearing reserves to meet a balance-of-payments financing need.

For the 2009 appropriation for the U.S. quota to the IMF, see the account entitled "United States Quota IMF Direct Loan Program".

In April 2008, IMF members reached agreement on a quota reform package as a first step to modernize the IMF's governance structure to keep pace with the rapid growth and greater economic weight of dynamic emerging economies. The Supplemental Appropriations Act of 2009 (Public Law 111–32), enacted June 24, 2009, provides authorization and appropriations for an increase in the U.S. quota to the IMF by the dollar equivalent of SDR 4,973,100,000 (about \$7.7 billion as of December 30, 2010). This increase in the U.S. quota is not yet effective, and will not come into effect until other IMF member countries undertake certain actions with respect to the IMF.

While the U.S. quota to the IMF is not a credit program, the Supplemental Appropriations Act of 2009 (Public Law 111–32) specified that the 2009 appropriation to increase in the U.S. quota in the IMF is to be scored on a credit reform basis, per the Federal Credit Reform Act of 1990, with an additional adjustment to the discount rate for market risk. The application of FCRA by operation of law to the 2009 quota appropriation is a significant change in the budgetary treatment of the U.S. quota to the IMF and does not apply to appropriations for the U.S. quota to the IMF prior to 2009.

UNITED STATES QUOTA IMF DIRECT LOAN PROGRAM ACCOUNT—Continued

As authorized by Public Law 111–32, and required by the Federal Credit Reform Act of 1990, as amended, this account records, for this program, the subsidy costs associated with the increase in the U.S. quota to the IMF, as reflected in the 2009 Supplemental Appropriations Act. The subsidy amounts are estimated on a present value basis using a market risk-adjusted discount rate, as required by the 2009 Act.

For additional information and the status of funds for the U.S. quota to the IMF prior to 2009, see the account entitled "United States Quota, International Monetary Fund".

The General Arrangements to Borrow (GAB) were established in 1962 by 10 industrial countries, including the United States, as a means of supplementing the IMF's resources when needed to forestall or cope with an impairment of the international monetary system. GAB members agreed in early 1983 to increase their financial commitments to the GAB from approximately SDR 6.3 billion to SDR 17 billion (about \$17.9 billion at that time), with the U.S. share rising from SDR 1.9 billion to approximately SDR 4.25 billion (about \$6.5 billion as of December 30, 2010).

In January 1997, the Executive Board of the IMF approved the creation of the New Arrangements to Borrow (NAB) to further supplement resources available to the IMF to forestall or cope with an impairment of the international monetary system or to deal with an exceptional situation that poses a threat to the stability of the system. The NAB became effective on November 17, 1998, and was activated in December 1998 to finance an IMF arrangement for Brazil. The IMF repaid the NAB in March 1999. In 2010, twenty-six countries and institutions participated in the NAB through a set of credit arrangements with the IMF totaling SDR 34 billion (about \$48 billion on the date of establishment), of which the U.S. share is approximately SDR 6.6 billion (about \$10 billion as of December 30, 2010). Although the GAB continues to exist, the sum of loans advanced under NAB and GAB cannot exceed SDR 34 billion. The sum of U.S. loans advanced under both arrangements cannot exceed the U.S. share of the NAB. Neither the NAB nor the GAB has been activated since 1999.

This account reflects GAB and NAB resources appropriated prior to 2009. With respect to this account, financing extended by the United States under GAB and NAB does not result in any net budget outlays because such financing results in an equivalent increase in U.S. international reserve assets in the form of a claim on the IMF.

At the G-20 Leaders' Summit in London in April 2009, the President secured agreement to increase the NAB by up to \$500 billion to restore global confidence and ensure the IMF has adequate resources to play its central role in resolving and preventing the spread of international economic and financial crises. As part of this agreement, the United States committed to increase its participation in the NAB by up to \$100 billion, which required congressional action. The Supplemental Appropriations Act of 2009 (Public Law 111-32) enacted on June 24, 2009, provides authorization and appropriations for an increase in the United States participation in the NAB by up to 75 billion SDRs. This SDR amount is subject, as a practical matter, to the public commitment to an increase by up to \$100 billion. This increase in the United States participation in the NAB is not yet effective, and will not come into effect until all IMF member countries

participating in the NAB undertake certain actions with respect to the IMF.

While U.S. participation in the NAB is not a credit program, Public Law 111–32 specified that the 2009 appropriation for the increase in the U.S. participation in the NAB is to be scored on a credit reform basis, per the Federal Credit Reform Act of 1990, with an additional adjustment to the discount rate for market risk. The application of FCRA by operation of law to the 2009 NAB appropriation is a significant change in the budgetary treatment of appropriations for the NAB and does not apply to appropriations for the U.S. participation in the NAB prior to

As authorized by the Supplemental Appropriations Act of 2009 (Public Law 111–32), and required by the Federal Credit Reform Act of 1990, as amended, this account records, for this program, the subsidy costs associated with increased participation by the U.S. in the NAB, as reflected in the 2009 Supplemental Appropriations Act. The subsidy amounts are estimated on a present value basis using a market risk-adjusted discount rate, as required by the 2009 Act.

For additional information on the NAB and the status of funds for the U.S. participation in the NAB prior to 2009, see the account entitled "Loans to International Monetary Fund".

The Special Defense Acquisition Fund will help to better support coalition and other U.S. partners participating in U.S. overseas contingency and other operations and expedite the procurement of defense articles for provision to foreign nations and international organizations. This legislation will re-activate an International Assistance Program account managed by the Department of Defense for advance purchases of defense articles. Advance purchases will focus initially on high-demand warfighter support equipment that has long procurement lead times. Long procurement lead times are often the main limiting factor in our ability to provide coalition partners with critical equipment to make them operationally effective. Improving the mechanism for supporting U.S. partners is a high priority for both the Departments of State and Defense.

In December 2004, a devastating tsunami and earthquake affected a number of countries in southeast Asia. The United States responded with a quick infusion of emergency assistance, followed by funding for rehabilitation and reconstruction. Assistance provided in the supplemental was designed for rebuilding communities and infrastructure, helping individuals return to their original livelihood, training individuals, particularly women, to develop new skills, and supporting host government-led reconstruction and early warning/disaster preparedness efforts. Funds were also used to reimburse other accounts obligated for relief and rehabilitation efforts in the immediate aftermath of the tsunami. The largest amounts of funding went to assistance for Indonesia and Sri Lanka, with smaller programs in India, Thailand, and the Maldives. Funds were also provided to support regional programs, such as development of an early warning and disaster preparedness system for the Indian Ocean, and to support prevention and preparations against avian influenza.
